

# INFORMATION ABOUT PUPPIES

**By Daniel Kelly Animal and Pets Reporter**

Puppies are one of the most loved animals ever made, and they can make the best companion for your child. Some people are not too sure about getting a puppy because of what they could do to your house, furniture, ornaments and much more. The following helps with how to train a puppy and look after it so they feel loved and welcomed.

## PUPPY'S FIRST DAY:

When you bring your puppy home you want it to be welcomed in a nice way, don't you? Well you can do this by bringing a blanket with the mother's smell on to comfort them. Another way is to make sure it has a lot of things to play with. At first they will not know where to go to the toilet, so make sure you have training

pads for them to use. Make sure when they use the pad they are rewarded with a treat!

A spray will help to stop the puppy from biting any furniture!

## FEEDING YOUR PUPPY:

Your puppy will obviously have to eat, but what do they like? When you first get the puppy, the people may inform you of what they have been feeding it and may even give you some to take with you. The amount you should give them and the instructions will be on the back of the bag. Make sure they have a food and drink bowl!

## WHAT YOU WILL NEED:

A bed, toys, food, bowls, treats, training pads, maybe a puppy gate and a grooming set.
